RE: FILE 16-245

I fully support Netflix's filing that broadband providers should not be able to set data caps, especially low data caps. This is a way to control how people use their internet and force people to buy the broadband providers' TV plans. It's just a ploy to hurt competition, and, thereby, hurt consumers.

Do not allow broadband companies to set data caps. Please vote on this quickly and, if possible, have it take immediate effect.

Thank you,

William McMullin
